Welcome to your very own slice of paradise, set on approximately 8 acres of off-grid living. This stunning property is a rare find, offering a unique blend of modern comforts and natural beauty. Fenced into two paddocks, the house sits in a cleared area of about 5 acres, with the remaining 3 acres preserved as natural bushland for animal habitat. Embrace sustainable living with a fully off-grid setup, complete with new lithium batteries ensuring a reliable power supply. Water abundance is guaranteed with two sources: a large dam in the house paddock and a smaller water hole in the rear paddock, providing ample water for your needs. The house is marketed as walk-in, walk-out and comes fully furnished. The owners are even leaving behind a large zero-turn mower to help you keep the property looking pristine. Modern comforts are evident throughout the home, including a new kitchen featuring timber benches, a large freestanding stainless steel gas oven and cooktop, and a reverse cycle air-conditioner. The unique design of the home boasts veejay roof and walls and exposed steel beams, adding character and charm. Outdoor living is a delight with a wrap-around veranda, landscaped gardens, and multiple outbuildings. Entertain family and friends with the pizza oven and BBQ area. The property also includes a carport for convenience. At the heart of the property, you'll find a large enclosed netted orchard with approximately 44 mixed mature trees and garden beds ready for your summer veggies. This property presents beautifully and is truly move-in ready. Opportunities like this are rare, so act quickly. Make this off-grid haven your new home and experience the best of both worlds - modern living in a natural setting. For more information or to schedule a viewing, contact us today!
