\$1,195,0000

Located 6kms from Foster via sealed road, this fully renovated home sits upon 85 acres (approx) of productive grazing land with Pebble Creek running through it. The original home dates back to the early 1900's, and has recently been restumped, rewired and replumbed, including a new roof, replastered and fully insulated, all the while retaining the home's character, including the original baltic pine flooring. Offering four bedrooms, this home is a comfortable haven for the family. The land is undulating to hilly with some small stands of blackwood and native trees, and offers great views in nearly every direction. Pebble Creek is a permanent stream which is home to platypus, and provides a source of water for livestock along with dams. A highly productive parcel of land in a high rainfall area with a character filled home.
