Blue Ribbon Beef Country

Well known as one of the best beef producing blocks in Denmark, this 314 acre property is an absolute ripper. Consisting of approximately 225 acres of pasture and the balance being fenced off remnant vegetation, the calves turned off this block have attracted attention from far and wide, with the the sellers enjoying top prices for their stock at the local sale yards in Mt Barker year after year. Their dedication to a rigorous application of fertiliser over many years, combined with some of the most productive soils in the area makes this property an absolute stand out as far as farming property goes on the South Coast - on or off the market. Mains power is connected to the property, with a bore supplying water to a header tank and then troughs. A steel framed 7m x 14m machinery/hay shed is also available, with this location being an ideal future homesite having power nearby and providing a great view over the farm. If you're in the market for rural land on the South Coast, this one will not disappoint. Contact Andrew Barrow on 0409081075 for further details.
